

DNA MANIFESTO

1. INTRODUCTION AND STATEMENT OF THE PROBLEM

Since the so-called “covid crisis” began in March 2020, a large number of people, distributed throughout all areas and strata of society, have been observing a series of events with great concern:

- I) Serious restrictions on Fundamental Rights and Freedoms, carried out without the existence of scientific consensus about their relevance and effectiveness, without the approval and consultation of the Sovereign People, and in many cases justified from reports made by “Committees of Experts” that nobody knows about and that may even later be recognized as “non-existent”. Restrictions that usually also come accompanied in time by the corresponding judicial reprimand that, surprisingly, does not cause in the political authority any hint of self-criticism; Rather, on the contrary, causing in her a rabid reaction against the judicial body that had the “audacity” to go against her designs.

In a system of separation of powers such as the one in force in Western Democracies of enlightened origin, these “frictions” between the Executive Power (in the hands of the political parties; strongly hierarchical power structures) and the Judicial Power (made up of independent and autonomous jurists) always inform us of a problem: they are a clear symptom that the Executive Power is exceeding its limits.

- II) Propaganda and biased use of information; with a clear tendency to exaggerate and magnify everything related to the seriousness and dangerousness of the disease, to stigmatize the dissident, and to impose a kind of “single thought” not only in relation to the Covid-19 crisis, but in all the issues and problems that affect society as a whole: climate change, organization of the economy, migratory crisis, relations between men and women ... In all these cases, the media and, in general, the entire cultural apparatus (which together, they form the so-called “thought industry”) seek to convince us that there is only one correct way to address these challenges: theirs; that of the tiny

minority of great fortunes that, directly or indirectly, controlling the aforementioned "thought industry", the most relevant international organizations as well as the leadership of the most important and representative political parties, are at the present historical moment directing the destinies of the western world and those of a good part of the rest of the planet.

III) In this general framework, smear and censorship campaigns directed against anyone who deviates - even slightly - from the official version, have become common, being systematically and routinely carried out. Being these extreme measures of information control applied not only to anonymous citizens, but also to top level scientists; even censoring Nobel Prize winners' opinions.

IV) In short, we are witnessing the use, by a supposedly democratic political power, of practices and methods of human groups control based on Social Psychology and Mass Manipulation Techniques studied and carried out in the past by totalitarian regimes. These include:

1. The omnipresence of official propaganda.
2. Constant use of emotional engineering.
3. Manipulation of statistics and concealment of data.
4. Dogmatic and interested use of Science.
5. Constant police presence, entrusting the security forces with the "surveillance" of the entire population as a whole, thus losing its own sovereign power, to be relegated to the status of simple subjects always suspected of not devoutly complying with the measures that, gradually and in increasing number, tend, little by little, to "order" and control (following the standards established as "correct" by the dominant minority) each and every one of the aspects of daily life.
6. "Strategic" use of lies, framed in a general context of "post-truth" where truthfulness and rigor are not values taken into account; being the most important the appearance and the forms.
7. Exclusion from social life and subsequent removal of all those who have the audacity to disagree with the official "truths" spreaded by the propaganda organs.

8. Paternalism, after a previous stage of infantilization and indoctrination of the population in the "values" established by the ruling class.

Faced with this state of affairs, many of us have become aware that Humanity is at the present historical moment at a crossroads. A handful of families that, as a whole, monopolize and control a vast economic and cultural structure, seem to be wanting to impose a new paradigm in the so-called "Free World" in which individual Rights and Freedoms have to pass to a second plane, being relegated by other values ("the Common Good", being a "good citizen", submission to the dictates of official "science", ...) that, deep down, have no other purpose than being the alibi that leads to the establishment of a new taylor-made system of social organization; a system in which the vast majority will have no other destiny than to submit to the dominance that this tiny minority is determined to consolidate; a system based on the concentration of power, on the emptying of Democracy and on a draconian control of information; a system in which the mere fact of thinking differently from what this elite may, at a given moment, consider as "correct" will be a reason for social exclusion and rejection, if not persecution.

Before this threat, and observing that since the so-called "covid crisis" this process has been notably accelerated, many of us, aware of the historical moment in which we find ourselves, have decided that the time has come to try to reverse the situation: it is with this purpose that DNA PROJECT arises.

2. WHAT IS DNA?

DNA is a program of political and cultural action whose objective is to group under the same political flag all the world dissent. DNA arises with this unifying purpose, being conceived from the conviction that, since our adversaries act all over the world (millimetrically coordinating) the vast means with which they count), we will only have a chance against them if we are able to organize a global resistance that responds united the attacks that, in order to consolidate its position of dominance, the miniscule elite of plutocrats that we are facing, will not cease to launch against all those who oppose them.

This project comes from the realization that, after a year and a half of confusion, the current situation of lack of union in which the

various spontaneously worldwide emerged resistance groups are must cease, thus giving way to a new stage in this undeclared war that, according to many of us, has only just begun.

Given the diversity of origins (political, national, religious, ...) present in a global movement of these characteristics, we must insist that the union that is sought (absolutely necessary and essential, if we aspire to have any option of victory) can only be carried out through a general exercise of renouncing the old ideological baggage that, present in all of us, could be a reason for division and discord: thus any DNA activist is asked to resign (or, at least, park temporarily) any ideological hindrance that could negatively affect the much-needed union that this project, DNA, intends to promote.

PRINCIPLES

3.1. PRINCIPLES OF ACTION

PRINCIPLE OF AUTONOMY: Personal and local. Each DNA activist and each local and regional cell will have freedom of action and must be self-sufficient. After careful thought, it has been decided not to create a control body; since, in spite of the advantages that the existence of such a board could provide with regard to the coordination of the network, it would in practice end up becoming a management organ liable to be corrupted and eventually end up controlled by the plutocratic elite (as it has been happening over and over again in the past).

The key point, we must insist on, is that all Dissidence must be grouped under the same acronym, DNA. Thus, in all areas and places, the Dissidence must carry out its actions - political, cultural or of any other nature - under these acronyms. A rapid proliferation of local cells is expected to collaborate with each other exchanging ideas, strategies, slogans ... thus creating a highly complex system, unmanageable in practice by any leadership or clique. DNA will do politics, but it will also create culture and above all, it will be the means for exchanging information, ideas and proposals that, in the end, will end up defining the path that, as Humanity, we decide to choose; path that, in no case, has to coincide with the one traced by the tiny elite that, with total arrogance, has had the audacity to decide for us all.

That said, it is the duty of local and regional cells to develop fully self-sufficient local structures: registration as political party (for example, DNA London or DNA Edimburg) or presentation in elections as independent, being the banner (the Double Helix) and the initials, DNA, always visible.

PRINCIPLE OF DIRECT DEMOCRACY: Insisting especially on the overcoming of the Political Party concept as a structure for political action, and openly promoting their dissolution because it is a failed instrument of democratic channeling. The articulation and implementation of systems of participation and selection of leaders based on Direct Democracy is left to the discretion of each local cell; with the most possibly diluted distribution of power (always bearing in mind, as History has taught us time and again, its psychological toxicity).

PRINCIPLE OF NEED: Given the present extremely serious situation we are facing, this global political union (which, if we cause it to succeed, would be called to be the most important political organization in the world) seems like a “real must be”, an absolute priority for all those involved in the cause of Freedom, being its creation a priority objective, making any delay or reluctance inexcusable. Thus, it is insisted that any ideological difference or past prejudice be put aside, at least as long as the emergency we are facing has not been completely neutralized.

3.2. STRUCTURAL PRINCIPLES

PRINCIPLE OF DUALITY: Political action should be inspired by the existence of a huge international forum where anyone can present their ideas with total freedom and no censorship; an authentic Free Market of Ideas where the actions of the Dissidence naturally find their way and end up impregnated by their actions, those that, selected by this Darwinian mechanism, are, in fact, the most timely, correct and profound. This will be the mortar that will actually bind the Dissidence: a form of "natural leadership" that does not need control or directive bodies of any kind.

DNA will thus be a system of political action and, at the same time, a movement for the creation of ideas, a system for the creation of culture.

PRINCIPLE OF FRACTALITY: An organization in superimposed dimensional layers, structurally identical, acting under the same principles of action already exposed. In other words, the same form of organization used at the local stage is used at the regional, national and international stages; in such a way that the same knowledge that is acquired, ways of doing things and infrastructures are interchangeable from one stage to another.

NETWORK STRUCTURE: In front of the pyramidal structure presented by the enemy, DNA will oppose an absolutely horizontal structure in the form of a network, the leaderships being of natural kind, absolutely fluid and not subject to any form of hierarchical "marking" that prevents this "natural" flow of leadership: We will flow like water. Point out that the pyramidal organization that our adversaries oppose us, despite having certain advantages (greater coordination and speed when implementing strategies) presents obvious vulnerabilities that we must be able to exploit until the end:

- i) Location of the dome, which we can directly and personally pressure, thus conditioning the behavior of the entire pyramid.
- ii) Rigid and / or hereditary leaderships, which prevent the rise of natural talents and decision-making without prior free and constructive debate. (Its system for generating ideas and strategies is not a system where they compete in free competition, unlike ours).
- iii) Demotivation and low commitment of most of the members of its organization; many of whom are simple little value obedient servants.

4. SYMBOLS OF IDENTITY

ACRONYMS: DNA (or ADN in spanish)

SHIELD: The Double Helix of the Molecule of Life

HYMN: The Second Movement of Beethoven's 7th Symphony

These symbols are to be universal: all political cells must participate covered by them in all kind of elections and political struggles that take place in their respective territories. To respect this is a must; It can almost be said that only by respecting this, the unity of symbols, will this movement be able to exert, with no doubt, a very high pressure on our adversaries, seriously compromising their capacity to act.

5. FINAL CONSIDERATIONS

DNA is above all a collective work; all what is exposed in this document is nothing more than an action plan that includes only the most general and fundamental aspects of the movement. DNA is thus a project belonging to everyone and to no one in particular; Each activist, each local cell will therefore have a responsibility in their actions, since it is by linking of all of them that the movement will be consolidated and shaped.

A fast growing Movement that will be seen by our adversaries as a serious threat to their plans for total control. It is for this reason that they will try to discredit it by all means: they will play dirty, and will in all probability try to infiltrate violent elements that with their actions discredit the movement as a whole in order to justify measures such as its outlawing. All activists should be on the lookout for this.

Finally, it is fair to say that although everything is still now to be done, the forward motion has already been geared. So dear fellow, wherever you are, no matter where you live, speak the language you speak, get up and fight, get up and work, take a deep breath and launch yourself to encounter your future with dignity.
